

Technical datasheet

FLY latex

Multi-purpose bonding agent and admixture for cement based mortars and putties

Description

FLY Latex is multi-purpose admixture special formulated to be used with cement mortars and gypsum to improve adhesion and workability

Uses

- ✓ Bonding agent with Taneem gray cement putty to be a final coat to cosmetic and patching pre-cast concrete products
- ✓ Cement based spatter dash mortars
- ✓ Increase the bond of mortar, render, tiles adhesive and cement putty
- ✓ Increase the strength of the gypsum and cement based GRC product
- ✓ Increase the productivity and workability during the application

Advantage

- ✓ Improve abrasion resistance
- ✓ Improve adhesion on cement based mortars
- ✓ Improve strength of GRC product
- ✓ Reduce shrinkage

Technical data

color	white
Solid content	Approx. 50%
Coverage rate	0.5 KG/m ²
Specific gravity	1.1 KG/L

Application procedures

Diluted with water with ratio 1:3 and mix with the cement or gypsum mortar well till reach the suitable consistency

Storage

Shelf life is 12 months from manufacturing date in a dry, covered storage area

Packaging

FLY Latex is available in 1, 4 and 20 Liter Jerry cans.
